Art Unit: 1743

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 18, 2004 has been entered.
2. The restriction requirement is withdrawn based upon the amendments, applicant's arguments, and the art.
3. The drawing corrections were received on May 18, 2004. These drawings are accepted.
4. Claims 35-67 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 35, "large group" both occurrences, is indefinite because it is a relative term lacking comparative basis. In claim 47, "very large number" is indefinite because it is a relative term lacking comparative basis. In claims 48 and 62, "the...characterization means" lacks antecedence. In claim 49, "the means for generating" lacks antecedence. In claim 53, "the means for generating" lacks antecedence. In claim 63, "the means for illuminating" lacks antecedence.

5. Claims 35-67 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 1743

6. The following is a statement of reasons for the indication of allowable subject matter: Applicant's arguments are persuasive with respect to Wang. Note that the claims are interpreted in view of the arguments and specification such that "vibrational spectroscopy" indicates infra red or Raman spectroscopy (p. 10, lines 22-25 of response filed May 18, 2004) and "vibrational spectrum of ... each cell" indicates intrinsic vibrational spectrum of each cell (p. 10, lines 7-8 of response filed May 18, 2004).
